

# Health & Social Care Teacher

We are seeking to appoint a committed Health and Social Care teacher to join a team of fifteen other specialists; an ability to work with others in this team is therefore very important. A willingness to contribute to other courses in Science such as Personal, Social, Health & Economic Education at Key Stage 3, Key Stage 4 and/or Sixth Form is possible.

The Science area has the facility of nine well equipped laboratories, three preparation rooms, two study rooms and is supported by three laboratory technicians. Information and Communication Technology skills and a working knowledge of relevant software would be an asset but are not essential as long as candidates are willing to improve current skills in this area. The School provides considerable technical and professional support to assist in this.

In the Sixth Form students are able to study either the Single Award or Double Award Health & Social Care. GCSE Health and Social Care is also an increasingly popular option at KS4. Dedicated facilities are available to support these courses which are growing in popularity at the School

The School is a City Technology College and as such does have a bias towards Science, Technology, Mathematics and Business Education. Our students perform well in public examinations. In Science 100% of GCSE grades achieved were A\*-C. In the Sixth Form we have an excellent success rate in all our courses.

We welcome the application of dedicated specialist teachers, keen to contribute to an exciting School.

E Powell

**Head of Science**
